Hi there. I think that the Maryland Heights monitor in St. Louis County is pretty close to Bridgeton. It's an ozone monitor. I don't know how "close" you are looking for. There is also a PM monitor at the Ladue location.

Of course, these are only DNR run monitors, I don't know if any other facility near by might have a monitor.

Check out page 16 of this PDF file, it has the ozone map and shows that Maryland heights has a DV of ~75 for ozone.

Let me know what else I can look up/help out for you.

Thx!

Amy – Do you have any info regarding air monitoring at/near the Bridgeton Landfill in Bridgeton, MO?

Thanks,

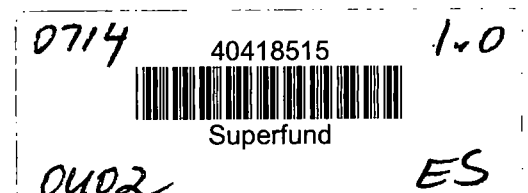

Gary Bertram

Gary: Can you find out whether there are air monitors near the landfill, where are they located, how many there are, and what they monitor for?

Thanks!
